DOB 03/08/2003

Objective

As a web developer, my objective is to create user-friendly and efficient websites that are visually appealing and easy to navigate. I utilize my skills in HTML, CSS, JavaScript, and PHP to develop websites that meet all the requirements of the client. With my Full Stack Developer course expertise, I am confident that I can apply these skills to a Web Developer Role, and would like the opportunity to work with more complex codebases. In addition to development, I also offer maintenance and support services to keep the website running smoothly. My ultimate goal is to provide clients with a high-quality product that meets their expectations and needs.

Hobbies

learning new things
